

AV 2091

Eggbeater SATCOM Antenna

The AV-2091 Eggbeater is a UHF SATCOM antenna. This antenna is ideal for high speed SATCOM On The Move (SOTM) operations on vehicles and helicopters.

The AV2091 can be used with most tactical Multi-Band radios (MBMMR), as well as all airborne/ground transceivers that accept a 50 Ohm antenna impedance.

Available in Black and Sand finish and with Magnetic mounts.

- AV2091-0-10 fixed mount, desert sand
- AV2091-2-00 magnetic mount, black
- AV2091-2-10 magnetic mount, desert sand

Specifications

Frequency	243-318 Mhz
VSWR	1.5:1
Polarization	Right Hand Circular
Gain	+6 dBci
Platform	ground Vehicles or Helicopters
Power Handling	200 Watts CW
Magnetic Mounting	YES
Weight	1.6 lbs
Connector	N Female
Finish	Black or Desert Sand
Qualifications	Mil Std 810
